Ken-Tool brings back an old favorite – T45AC Classic

Ken-Tool's patented designs offer one-piece construction, and assure long life for many tire-changing applications.

Tip ends insert easily and will not cut or rip bead or sidewall. These designs make it easier to mount and demount tires without changing the way the tool is used.

Mount end: Precision-forged knob grips rim. Tip designs won't slip during tire mounting. Special curve design always grabs the bead edge.

Demount end: Precision-forged angled tip slides between bead and rim easily. Forged design won't slip when demounting the second bead.
