  - Plus 50 extra TPMS approved nickel plated valve cores and 50 extra approved plastic caps
- In 3" x 9" x 16" Portable Poly Case, 3-lbs. Replacement Hardware Kits Available From Ken-Tool**

Complete Vehicle Application Guide

**OEM RECOMMENDED REPLACEMENT**

Most OEM sensor manufacturers recommend that the TPMS valve kit be replaced whenever the valve is removed or loosened from the sensor to ensure the system is working properly. Once the valve or sensor is loosened, original and worn components are more likely to allow air to leak or escape. Replacing old components helps the TPMS sensor function properly when the tire is remounted on the vehicle.

**TPMS Sentry™ Sensor Service Tool**  
Designed to keep the sensor in a safe and secure position after the mounting nut has been removed and the sensor is released from the wheel.
