

# T11ES Duck-Billed Bead Breaking Wedge

## With Specially Coated Orange Safety Grip Handle

### *Better Grip – Better Control!*

**Introducing Ken-Tool's T11ES Duck-Billed Bead Breaking Wedge. One of our most popular bead breakers made even better.**

- Specially formulated granulated handle coating provides extra grip for sure control of the steel bead breaking wedge
- Coating compound is waterproof and oil and chemical resistant for durability and long life
- Safety orange color to make the tool easy to find and “not left behind!”
- USA-prime top-quality Hickory handle is known for its strength and toughness

### **Improved Hammer Head to Handle Contact Safety**

- Increasing the contact area between the handle and the hammer head causes the handle to have a tighter fit when the head is seated on the handle
- By increasing end-taper of the handle the hammer head cannot come off the end of the handle

**Improved Performance** of the assembly by removing the slits in the top of the handle, thus minimizing the effect of Humidity/Climate (expansion & contraction) on the handle.

**Improved Quality and Strength** of the handle by adding more wood to the end of the handle.
