**CHECK AIR PRESSURE AT ANY TIME  
 WITHOUT REMOVING HUB CAPS FROM  
 SINGLE WHEELS!**

Air-Flexx valve extensions are flexible but rigid enough to eliminate the need for a rim holder, clamp or stabilizer during inflation, saving time and money. If the extension is severed or broken no pressure is lost from the tire. For use on spare wheels with angled extensions of 45°, 90°, 135° or 180°.
