Ken-Tool's history begins in 1920 when John A. Kennedy, self-proclaimed tire changing champion of the world, invented the Pacific Rim Tool. This revolutionary tire changing tool, endorsed by the B.F. Goodrich Company, began selling to garages and tire shops throughout the country. At this time, Kennedy had no manufacturing capability, so in 1925 he formed a partnership with J. Frank Kemmerline of the Cornwell Tool Company, and officially started the Kennedy Tool Company. Their primary product was the now-famous Pacific Rim Tool. During the next year, 1926, over 100,000 of these tools were shipped from their Ohio plant.
BLUE COBRA® TRUCK TIRE DEMOUNT TOOL

Quickly demount nearly any 22.5” and 24.5” tubeless truck tire, up to a 13” wide wheel. Allows demounting of the tire without lifting the entire wheel and tire off the ground — reduces back injuries. Imported.

ERGONOMIC SHAPED STEEL HANDLE REDUCES BACK INJURIES

NO-SLIP GRIP FOR OPTIMUM LEVERAGE

ALUMINUM BEAD SUPPORT TO GRAB THE TOP BEAD OF SUPER SINGLE AND SUPER WIDE TIRES

SOLID STEEL COBRA HEAD IS PRESS-FIT INTO THE STEEL HANDLE — NO FASTENERS TO LOOSEN OR FALL OUT

2 HEAVY-DUTY NYLON ROLLERS ARE EASILY REPLACED WHEN WORN

BLUE COBRA® TRUCK TIRE SERVICE SETS

The Blue Cobra® Truck Tire Service Sets contain all the tools you need to change most 22.5” & 24.5” tubeless truck tires quickly and easily.

NINETEEN-FIVE™ MOUNTING & DEMOUNTING TOOL SET 33199

Nineteen-Five™ bars are specially designed to work on the hub side to make your job easier, faster and safer! Tools are powder coated to protect from rust and corrosion. Forged from 1/4" diameter high-grade carbon steel and heat-treated for long-lasting strength and durability.

17.5 SIDEWINDER™ KIT 35459

Kit Sidewinder™ de 17.5

The first tire tools designed exclusively for 17.5" tires found on vehicle transporter moving vans and high volume trailers!

Nineteen-Five™ bars are uniquely designed to work on hubside of wheel — where hub protrudes above rim. Specially designed ends manipulate tire for wide-base Super Singles, Ken-Serpent™ Tire Changing Systems and large, wide-base truck tires. Use “C” bar with the “E” extension bar for easier use on large, wide-base truck tires. Use on standard and large truck tires, including industrial, farm, buses, and tractors.

The first tire tools designed exclusively for 17.5" tires found on Ken-Tool’s patented designs offer one-piece construction, and assure long life for tire changing needs. Use on truck, agricultural, and industrial tires. One-piece manufacturing process and design assures long life and superior performance. Heat treated for strength. Use in pairs.

**SERPENT™ DEMOUNT TOOL 35449 T2001**

Herramienta de desmontaje

Outil de démontage

Length: 39” (99 cm) | Stock: 3/4” (19 mm) | Weight: 6.5 lbs (3 kg)

Makes demounting easier than ever. Demounts both beads on most larger truck tires without the need for lifting the tire/wheel assembly off the ground, and then dropping it. Made of heat-treated alloy steel for maximum durability and strength.

**SUPER SERPENT™ MOUNT TOOL 35447 T2005**

Herramienta para montar

Outil d’assemblage

Length: 37” (94 cm) | Stock: 3/4” (19 mm) | Weight: 5.5 lbs (2.5 kg)

Weighing in at only 5½ pounds, this unique, lightweight demount tool for super singles can be lugged around on a fingertip, yet delivers the incredible leverage right where it’s needed to easily pop those heavyweights right off their wheels.

**SERPENT™ MOUNT TOOL 35450 T2002**

Herramientas para montar

Outil d’assemblage

Length: 38” (96 cm) | Stock: 3/4” (19 mm) | Weight: 4 lbs (1.8 kg)

Makes mounting easier than ever. Designed to stop against the rim, and then remove itself effortlessly from between the rim and bead. The small end of the tool easily gets under the stretched bead for that last pull.

**SUPER SERPENT™ DEMOUNT TOOL 35448 T2006**

Herramienta de desmontaje

Outil de démontage

Length: 37” (94 cm) | Stock: 3/4” (19 mm) | Weight: 6.6 lbs (3 kg)

Use this end to demount first bead, opposite end to demount second bead.

Herramienta para montar

Outil d’assemblage

Length: 37” (94 cm) | Stock: 3/4” (19 mm) | Weight: 6.6 lbs (3 kg)

This mount tool for super singles weighs about 6½ pounds and seems “funny-looking,” but every inch of this innovative design is purely serious. It makes interference of the second bead, while mounting the first bead, a thing of the past, and delivers twice the leverage of any “straight-type” tire mounting tool. It even has the small end that easily gets under the bead for that “last pull.”

TWIST SOCKET SETS WITH ORGANIZER BARS

Twist sockets are specifically designed to easily remove damaged, rounded or corroded nuts, wheel nuts, bolts, pipes, pipe nipples or studs. Simply place the socket on the failure, catch the head of the fastener and turn with an air ratchet, hand ratchet, or breaker bar. The unique spiral fluting bites onto the damaged socket so it barely catches the head of the fastener and turn with an air ratchet.

SOCKETS AND SOCKET SETS HAVE A LIMITED LIFETIME WARRANTY

Twist sockets are NOT recommended for use with impact wrenches.

WARNING: Always wear safety goggles when using hand tools.

### 2 lb. Rubber Mallet 35310 T32

**Handle Length:** 12” (31 cm)
**Head Weight:** 2 lbs (.9 kg)

Rubber head minimizes marring surfaces.

**WARNING:** Always wear safety goggles when using striking or shod tools. Never use any hammer to strike another hammer. Never use tool with a loose or damaged head. Discard any striking or struck tool if tool shows dents, cracks, chips, or missing heads.

**POLYMER HANDLED WEDGE**

*New handle design T31H (35230) will not work with old style T11E head*
WARNING: Always wear safety goggles when using hand tools.

**BALANCING & BEAD TOOLS**

**BALLANCE BALANCING & BEAD TOOLS**

Complete wheel end balancing

Ken-Tool Balancing Beads have you covered from motorcycle, passenger, light truck, off-road and class 5-8 vehicles. Our easy-to-use drop in bag saves time and money on new tire installation and can be injected through the valve stem to completely balance the axle end on existing vehicles without dismounting the tire and wheel. Memory technology keeps the beads stabilized, and can be injected through the valve stem to completely balance the axle end in existing wheel positions. Ken-Tool Balancing Beads balance the complete axle end…the tire, the wheel and all the moving components of the wheel assembly. TPMS compatible.

### BEAD SEATING TOOL

The Ken-Tool Bead lift the weight of the wheel off the bottom area of the bead of a standing/tire/ wheel assembly, in order to easily ensure the concentric seating of the bead on a standing Super Single assembly.

### EASY-LIFT™ BEAD SEATING STAND

Safety First! EASY-LIFT™ reduces back strain while handling 22.5” bead lift. Easy-Lift™ may be used on tires up to 24-1/2” diameter. Digital air pressure gauge and safety release valve included for operator convenience and safety. Plastic nose clip protects chrome and alloy wheels; replacements available.

### TIRE BEAD SEATERS

Calzador de ruedas

One-piece rubber tube for mounting hard-to-seat radial, bias-belted, or conventional truck tires. As tire is inflated, the lubricated bead seater forms a seal between the rim and tire, allowing the air pressure to force the beads into the rim flange. As proper pressure is reached, the bead seater slides out and over the rim. Use bead lubricant with bead seaters.

### PNEUMATIC BEAD EXPANDERS

Expansores neumáticos de llantas

Expanders fit most bias ply tubes and tires. A pliable neoprene rubber tube is encased in a tough, long-lasting nylon cover. Expanders slip easily over tire and withstand contact with oil, grease, solvents, and acids. Expanders passenger and light truck beads by compressing beads. **T133** is for smaller beads, **T132** for beadless bias ply tires and steel belt truss. Ken-Tool Balancing Beads have you covered from motorcycle, passenger, light truck, off-road and class 5-8 vehicles.

### WHITE TIRE PASTE 35848

MOVING INNER PIN OPENS TIRE VALVE ONLY WHEN CHECKING PRESSURE OR INFLATING

AIR-FLEXX® TRUCK TIRE VALVE EXTENSIONS
Extensiones de válvula de neumático de camión Air-Flexx®
Rallonges de valve de pneu de camion Air-Flexx®

Air-Flexx valve extensions are flexible but rigid enough to eliminate the need for a rim holder, clamp or stabilizer during inflation, saving time and money. If the extension is severed or broken no pressure is lost from the tire. For use on spare wheels with angled extensions of 45°, 90°, 135° or 180°.

**TIRE VALVE INSTALLER 29850**

**Instalador de válvula de llantas**

**Installer de vannes à pneus**

Threaded installer grips any standard tire valve! Screws on to cap of threads on tire valve and handle is used as a lever to pull tire valve into rim hole. Robust and durable for fleet use — steel construction provides leverage without bending.

Length: 12” (30.5 cm) Weight: .8 lbs (.27 kg)

**VALVECAPPER® PRO CAP & CORE TOOL 29999**

**Instalador de válvula de llantas**

**Instalador de vannes à pneus**

4 tools in 1! The Valvecapper® Pro makes it easier to check the inside dual! Designed by a trucker to make a difficult job easier, this patent pending design holds on to cores for easy removal and installation. No more moving your rig to position valve stems just to get to the caps, no more dropped caps — holds onto caps and valve cores for removing and replacing. The longer valve cap grip works on flow-through, double seal valve caps. At 3 1/2 inches it has enough reach to get the job done. Ultrareliable under normal use, the Valvecapper® Pro is designed for use on metal and plastic valve caps.

Weight: 1.5 oz (.04 kg)

**The Cooper Group**

**CREScent-KENTool-LUFkin**

In May of 1966, John Lydle sold the company to Cooper Industries of Houston, Texas. Ken-Tool was the third non-energy-service venture of Cooper and their first hand tool acquisition. In 1970, Ken-Tool became one of the original members of the Cooper Tool Group, along with Crescent hand tools, Weller soldering guns and Lufkin tape measures and rules.

In 1971 Ken-Tool began selling these products to the automotive aftermarket as Cooper’s only aftermarket distribution arm. As Ken-Tool became Cooperized, most of the non-Cooper buy-for-resale items were dropped from the line as focus was placed on those items of Ken-Tool’s manufacture. In 1972, the Kennedy brand of product was discontinued for good. The Ken-Tool line was now 95% product of its own manufacture and a springboard to sell other Cooper products to the aftermarket.

It’s simple. Remove the jaw from the front of the base, reverse the base 90°, then re-insert the jaw.
In April 1974, Ken-Tool was sold to Warren Tool Corporation in Warren, Ohio, a small, privately-owned manufacturer of vises, clamps and heavy striking tools. Under Warren Tool, Ken-Tool quickly dropped the product lines from Cooper and replaced them with those of its new sister divisions, Columbian vises, Warren striking tools, and Hargrave clamps. Three years later, Warren acquired Kal-Equip Company, a manufacturer of automotive diagnostic test equipment, and formed a new organization, The Warren Automotive Group. After several years, Warren Tool made the decision to sell Kal-Equip and re-establish Ken-Tool as a free standing, autonomous division of the Warren Tool Corporation. That structure continued until 1994, when all other Warren Tool operations were sold, leaving Ken-Tool as an entirely independent company.
