Ken-Tool's history begins in 1920 when John A. Kennedy, self-proclaimed tire changing champion of the world, invented the Pacific Rim Tool. This revolutionary tire changing tool, endorsed by the B. F. Goodrich Company, began selling to garages and tire shops throughout the country. At this time, Kennedy had no manufacturing capability, so in 1925 he formed a partnership with J. Frank Kemmerline of the Cornwell Tool Company, and officially started the Kennedy Tool Company. Their primary product was the now-famous Pacific Rim Tool. During the next year, 1926, over 100,000 of these tools were shipped from their Ohio plant.

**TUBELESS TIRE IRONS & SETS**

Juegos de herramientas de montaje y desmontaje de neumáticos de 19.5° Nineteen-Five™

Jeu d'outils de montage - démontage de pneus de 19.5° Nineteen-Five™

19.5° tires must be mounted and demounted with the wheel's Hub Side Up because the Drop Center of the wheels is closer to the hub! This makes changing the 19.5° tires notoriously difficult because the hub gets in the way of conventional bars and spoons. 19.5° tires are also stiffer with high ply ratings and thick beads. Patented Bead Holder to hold bead on 19.5° aluminum wheels.

HEXCHEX® MULTI-SIZE LOOSE WHEEL NUT INDICATORS

Indicateurs d’écrou de roue desserrés multi-tailles

COVERS 5 lug nut sizes from 3/4” (19 mm) to 2” (50 mm) and fit 6-, 8- and 10-sided lug nuts. Installs over a lug nut without damage.

KEN-TOOL PORKCHOP™

Wrench holds outer cap nut on dual wheels while the inner nut is turned. Up-fits in hole to secure wrench in place. Sizes offered fit standard and metric cap nuts.

HEAVY-DUTY CAP NUT WRENCHES

Llaves de tuercas ciegos de alta resistencia / Clés robustas a écrou borgne

Heavy-duty design will not slip out of position. Wrench rests snugly against the center hole, reducing the possibility of rim damage. Ideal for aluminum wheels. PATENTED.

MODEL POWER WRENCH

Llave eléctrica / Clé à chocs

Designed for dual nut systems. Has 1-1/2” sq. end to hold inner nut, with a 1-1/2” hex drive to spin outer nut off. Also adaptable to remove any nut size with a T-155 adaptor. 3-to-1 ratchet provides mechanical advantage necessary to remove any stubborn nut found on trucks, farm vehicles, buses, aircraft, and RV’s. Tremendous power allows one man operation. Heat treated portable components for extra strength. All sockets are 3/4” drive.

CAP NUT WRENCHES

Llaves de tuercas ciegas / Clés à écrou borgne

Offers the versatility of two wrenches in one unique product design. Fit one end onto the outer cap nut with the other end through the center hole. Wrench slides underneath center disc of wheel, reducing slipping during nut removal.

Available with buckets for extra strength. All sockets are 3/4” drive.

PILOT SLEEVE™ 30631

Manchas de centrage de roue en polyamide

Polyamide Wheel Centering Sleeves. Over time, the pilots on the hub can lose tolerances originally intended from the factory, allowing an offset between the wheel and the hub bearing. Polyamide Wheel Centering Sleeves take up the gap between the 22mm dual wheel and 26mm wheel opening, realigning the wheel to the TRUE CENTER of the hub bearing.

CHROME LUG NUT COVER REMOVER 30606

Desmontador profesional de cubierta con tuercas / Dégagéur professionnel d’écrou d’equipeurs de roues

Special coating will not scratch or damage chrome, painted, or coated lug nut covers. Adjusts to fit larger lug nuts.

### TWIST SOCKET SETS WITH ORGANIZER BARS

**Twist sockets** are specifically designed to easily remove damaged, rounded or corroded nuts, wheel lugs, bolts, pipes, pipe nipples or studs. Simply place the socket on a bar, tighten the head of the fastener and turn with an air ratchet, hand ratchet, or breaker bar. The unique spiral fluting bites onto the damaged socket so it barely catches the head of the fastener and turn with an air ratchet, hand ratchet, or breaker bar. For general automotive applications, twist sockets are not recommended for use with impact wrenches.

**2 LB. RUBBER MALLET 35310 T32**

Mazo de goma de 2 libras

Mallet en caoutchouc de 2 lb

Helmet head minimizes marring surfaces.

**WARNING:** Always wear safety goggles when using striking or chisel tools. Never use any hammer to strike another hammer. Never use a tool with a broken or damaged handle. Do not strike anything or strike tool if tool shows shiners, cracks, chips, or marring.

**Duck-Billed Bead Breaking Wedges**

Cosas desmontadoras de llantas de boca plana

Coins d’écartement de talons en bec de canard

**Wood Handled Wedge**

Con mango de madera | Manche en bois

Increased contact area between the handle and the hammer head causes the handle to have a tighter fit when the handle is seated on the handle. By increasing end taper of the handle the hammer head cannot come off the end of the handle. No slits in the top of the handle minimizes the effect of Humidity/Climate (expansion & contraction) on the handle.

**Polymer Handled Wedge**

Con mango de polímero | Manche en polymère

Hump design prevents tool fromwedging between rim and bead. Breaks the bead with little or no prying. New polymer handle design for longer lasting everyday use. Full length fiberglass core for greater strength. Coating on handle provides durability. Patented.

**Fiberglass Handled Wedge**

Con mango de fibra de vidrio | Manche en fibre de verre

Safest non-marring, non-sparking hammers available. Great for tire changing and general shop use. High quality materials to withstand years of hard use.

**New T11E Orange Safety Grip Handle. Specially formulated granulated handle coating provides extra grip for sure control of the steel bead breaking wedge.**

**WARNING:** Always wear safety goggles when using striking or chisel tools. Never use any hammer to strike another hammer. Never use a tool with a broken or damaged handle. Do not strike anything or strike tool if tool shows shiners, cracks, chips, or marring.
05 BALANCING & BEAD TOOLS

BALANCING BEADS
Complete wheel end balancing
Ken-Tool Balancing Beads have you covered from motorcycle, passenger, light truck, off-road and class 5-8 vehicles. Our easy-to-use drop in bag and all the moving components of the wheel positions. Ken-Tool Balancing Beads balance the complete axle end...the tire, the wheel and all the moving components of the wheel assembly. TPMS compatible.

PNEUMATIC BEAD EXPANDERS
Expansores neumáticos de llantas
Tubes d'extension de talon pneumatiques
Expanders fit most bias ply tubeless tires. A pliable neoprene rubber tube is inserted into the tire to inflate and lock the beads of the tire on the rim flange. It is suitable for all tires and wheel positions. Ken-Tool Balancing Beads inflate through the valve stem to save time and money on new tire installation. Models feature an over-pressure relief valve and external pressure release valve for safe operation.

BEAD SEATING TOOL
Herramientas para calzado de talon
Utilized on AUTO, ATV, and Truck Tires. Designed for use on tires up to 24-1/2 diameter. Digital air pressure gauge and safety release valve included for operator convenience and safety. Plastic nose clip protects chrome and alloy wheels. Replacements available.

BEAD SEATING STAND
Soporte para calzado de talon
Portable for field service, bead seater slides out and over the rim. Use bead lubricant with bead seaters.

TIRE BEAD SEATERS
Calzador de llantas
One-piece rubber tube for mounting hard-to-seat radial, bias-ply, or conventional truck tires. As tire is inflated, the lubricated tube contracts and secures the beads to the inside of the rim flange. As proper pressure is reached, the bead seater slides out and over the rim. Use bead lubricant with bead seaters.

WHITE TIRE PASTE 35848
Lubricante Blanco Paste Lube
Premium tire mounting/ demounting lubricant dries tacky to prevent rim slippage, with rust retardant. 8 lb. (3.6 kg).

**Valve Breaker Tool: How To Use It**

In May of 1966, John Lydle sold the company to Cooper Industries of Houston, Texas. Ken-Tool was the third non-energy-service venture of Cooper and their first hand tool acquisition. In 1970, Ken-Tool became one of the original members of the Cooper Tool Group, along with Crescent hand tools, Weller soldering guns and Lufkin tape measures and rules. In 1971 Ken-Tool began selling these products to the automotive aftermarket as Cooper’s only aftermarket distribution arm. As Ken-Tool became Cooperized, most of the non-Cooper buy-for-resale items were dropped from the line as focus was placed on those items of Ken-Tool’s manufacture. In 1972, the Kennedy brand of product was discontinued for good. The Ken-Tool line was now 95% product of its own manufacture and a springboard to sell other Cooper products to the aftermarket.

FREE 3 lb. Sledge included with K4650 & KT4800!

Professional Reversible Mechanic’s Vises feature:

It’s simple…Remove the jaw from the front of the base, swivel the base 180º, then re-insert the jaw.

WARNING: Always wear safety goggles when using hand tools.
In April 1974, Ken-Tool was sold to Warren Tool Corporation in Warren, Ohio, a small, privately-owned manufacturer of vises, clamps and heavy striking tools. Under Warren Tool, Ken-Tool quickly dropped the product lines from Cooper and replaced them with those of its new sister divisions, Columbian vises, Warren striking tools, and Hargrave clamps. Three years later, Warren acquired Kal-Equip Company, a manufacture of automotive diagnostic test equipment, and formed a new organization, The Warren Automotive Group. After several years, Warren Tool made the decision to sell Kal-Equip and re-establish Ken-Tool as a free standing, autonomous division of the Warren Tool Corporation. That structure continued until 1994, when all other Warren Tool operations were sold, leaving Ken-Tool as an entirely independent company.
