LOW PROFILE TRUCK DRAIN

PN 30599

DESIGNED FOR USE WITH TRUCKS, BUSES, RV'S & OTHER LOW PROFILE VEHICLES

The low profile truck drain is moulded from robust, lightweight, high-impact polyethylene. It is used to collect waste fluids, including diesel, kerosene, motor oil (up to SAE 90), non-corrosive media, transmission fluid, and coolants. Eliminates the need to lift the vehicle and features a removable anti-splash tray that does not allow solid particles / debris above 0.15" (3.8 mm) diameter to enter into the tank. Baffles inside the reservoir prevent oil spillage during transport.
